has warned the public that the Wuhan coronavirus (COVID-19) vaccines [are intentionally designed to harm, maim and kill people](#) and reduce human fertility.

In October 2023, Mike Yeadon, the former vice president and chief science officer of Pfizer, delivered a speech at a vaccine awareness event in London to warn people about the vaccine scheme.

"If you've followed me, you'll know I've over 30 years in research in the pharmaceutical industry and biotech," Yeadon said. "That gives me the credentials to stand as it were in the shoes of the designers of these vaccines and answer the question: 'What were you thinking when you made these design decisions?'

"These materials were designed intentionally to harm, maim and kill, and to reduce human fertility. That is my verdict. If you add together the lies, the economic destruction, the murder and the intentional harm from the injectables, I'm afraid the only conclusion I come to is [that] somebody up there wants to reduce the population," Yeadon continued. Yeadon said he was "sure" the vaccines were intentionally designed to cause harm.

Yeadon has been warning the public about the adverse effects of COVID-19 vaccines for several years now

For years, [Yeadon has been a vocal critic of the mRNA vaccines](#).

He has been repeatedly expressing his fears about their potential dangers and the possibility of a global depopulation agenda at different vaccine awareness events. So his 2023 speech was already repeated in other similar events throughout the years.

For instance, in his speech that went viral on Facebook in 2021, Yeadon revealed all the lies he knew about the COVID-19 vaccines.

First, Yeadon claimed that asymptomatic transmission of COVID-19 is either "rare" or "doesn't happen." Second, Yeadon dismissed concerns about COVID-19 variants, claiming there is "zero chance" that people immunized through vaccination or prior infection would be susceptible to them. Third, Yeadon alleged that the COVID-19 vaccines are neither safe nor effective, citing the number of side effects reported in monitoring systems in the United States and the United Kingdom.

Moreover, [Yeadon criticized the decision to vaccinate pregnant women](#), claiming it was made without proper reproductive toxicology studies.

Yeadon echoed the sentiments in an interview with America's Frontline Doctors in March 2021. At that time, he warned people not to go near "top-up vaccines" or booster shots, as some COVID-19 vaccines including Pfizer and Moderna require two doses.

"Please warn every person not to go near top up vaccines. There is absolutely no need to them. As there's no need for them, yet they're being made in pharma, and regulators have stood aside (no safety testing), I can only deduce they will be used for nefarious purposes. For example, if someone wished to harm or kill a significant proportion of the world's population over the next few years, the systems being put in place right now will

enable it. It's my considered view that it is entirely possible that this will be used for massive-scale depopulation," he said.
